

Black Angus  
Bulls For Sale

by *Private  
Treaty*

Robsart, SK

*Yearling Black Angus Bulls For Sale by Private Treaty*

As with many breeders this sale season, presale semen-testing found bulls environmentally stressed, particularly the yearling bulls with delayed puberty. The winter months were tough, notably late January to early March. We opted to remove the decision deferred bulls from our sale on April 1<sup>st</sup>. There was every indication that these bulls would achieve a satisfactory semen test and surpass puberty ... and that they did as of April 26th.

A quick explanation of the information provided;  
 • Photos were taken late February  
 • Most recent weight is from March 29  
 Visually you can expect maturity & additional pounds consistent with their development over the past 2 months.  
 • National Cattle Evaluations [EPDs] are conducted monthly. February calculations are offered here: Average EPDs for 2018 born calves are:

BW: +2.2   WW: +45   YW: +79  
 MILK: +21   TM: +44   CE: +3.2   MCE: +7.0

We encourage you to give us a call and arrange a visit to go through the bulls in their field. If time, distance or workload is a hindrance, please do not hesitate to contact us with any questions regarding the bulls being offered.

*Sincerely,*  
 The Delorme Family
